Vehicle Acquisition

The Automotive Division procures over a billion dollars in quality vehicles and automotive services annually. Teams of dedicated contracting and engineering personnel are ready to fulfill your agency's requirements. There is a large selection of vehicles available on multi-year contracts and on federal supply schedules. Also offered are alternative fuel vehicles including ethanol (E85), compressed natural gas (CNG), propane (LPG) and electric vehicles (EVs) to assist you in complying with Executive Order 13031 as well as the Energy Policy Act of 1992 (EPACT) and the Clean Air Act of 1990.

The following benefits are also provided for you:

- Competitive pricing from all the major vehicle manufacturers
- Multi-year contracts with multiple vendor selection
- Express Desk for urgent and compelling requirements
- Engineering staff to assist in developing specifications for nonstandard vehicles
- Easier and faster processing when orders are submitted electronically
- An online calculator to compare models and pricing - **AUTOCHOICE**

Vehicle Leasing

The Fleet Management Division is a full-service professional fleet management organization. GSA Fleet manages over 168,000 vehicles (and still growing) making GSA Fleet one of the largest non-tactical fleets in the world. GSA Fleet provides quality vehicles and economical services to over 75 participating Federal agencies, and also to other eligible activities.

All vehicles are leased on a cost reimbursable basis - charging a flat monthly rate and mileage fee that covers all costs including the vehicle, maintenance, fuel, accident management and even car washes. In addition, GSA Fleet is the largest AFV purchaser in the Federal Government.

In addition to providing day-to-day operational support to our customers, GSA Fleet:

- Provides low national lease rates set annually for easy budgeting
- Replaces vehicles as necessary to ensure a modern dependable fleet
- Provides maintenance and repair services through a Nationwide Maintenance Control System
- Provides a widely accepted commercial Fleet Services Card for the purchase of fuel and minor maintenance
- Provides professional accident management assistance
- Provides remarketing and disposal services for GSA Fleet vehicles
- Provides customers with various alternative fuel vehicle (AFV) products and services
